Introduction

This booklet is a guide for postgraduate Medical Surgical Nursing students. It contains the intended learning outcomes (ILOs) and courses description.

Medical Surgical Nursing Department

Medical–Surgical Nursing department envisions being a role model of excellence in nursing education and training. It aims to produce world class nurse practitioners through teaching, research and innovative extension services for sustainable scientific and technological development. The department ensures that high standards are maintained during training and practice while observing professional ethics of conduct. The Medical-Surgical Nursing department is the core department of Faculty of Nursing, which is hosting not only the basic nursing degree but also the postgraduate nursing programs. Medical –Surgical Nursing department offers Bachelor of Science in Nursing for direct entry students, Master of Science in Medical-Surgical Nursing program which is a specialized course that prepares nurses at consultancy level of their professional practice. It focuses on production of competent academic staff and clinical nurse practitioners in general nursing practice. Finally, the department is also offering **PhDs** in Nursing.

Vision of the Department

The medical surgical nursing department will innovate academic center for education, practice, research and community services responses to health and technological challenges at local, national and regional level.

Mission of the Department

To prepare a competent student who has the willingness towards continuous learning, scientific research and qualified in providing comprehensive nursing care for various medical surgical nursing specialties and able to compete at local, national and regional level.

Aims of the department For Doctorate's Program

Program's overall aim:

The doctoral candidate will be able to utilize advanced knowledge and critical thinking, problem solving skills and evidence-based practice to enhance clinical decision making and achieve high quality nursing care in Medical Surgical Nursing. This will be achieved through the following ILOS.

ILOs of the department For Doctorate's Program

1. Knowledge and Understanding Skills:

- 1.1. Explain learning issues and problems suitable for nursing research
- 1.2. Discuss the role of the clinical nurse specialist in medical surgical nursing.

- 1.3. Explain advanced knowledge and skill in managing adult patients with medical surgical disorders
- 1.4. Explain ethics of scientific research and legal practice in the conduction of research.
- 1.5. Discuss concepts, skills, quality improvement strategies and safety in medical surgical nursing

2. Intellectual Skills:

- 2.1 Design evidence based practice strategies, technology and creativity in nursing practice
- 2.2 Design the adequacy of underlying knowledge and procedures in medical surgical clinical practice.
- 2.3 Interpret ethical principles, critical thinking and problem-solving in nursing practice.
- 2.4 Design strategies capable of improving clinical effectiveness at local level.
- 2.5. Differentiate specialty and utilize research findings in medical surgical clinical practice.

3. Professional and practical skills:

- 3.1. Apply basic and advanced scientific knowledge in medical surgical nursing practice.
- 3.2. Apply research finding and evidence based practice in medical surgical nursing practice.
- 3.3. Implement education programs using information and communication technologies in medical surgical nursing.

- 3.4. Apply diagnostic and nursing intervention based on scientific evidence in medical surgical nursing practice
- 3.5. Demonstrate proper documentation and evaluate patient's reports in patient care

4. General and transferable skills:

- 4.1 Communicate information technology to design and evaluate nursing program.
- 4.2 Value self, long life-learning and self-evaluation for professional development in medical surgical nursing
- 4.3 Appreciate time management skills in medical surgical nursing
- 4.4 Communicate critical thinking, problems solving and decision making in medical surgical nursing
- 4.5 Value conditions surrounding patient situations for the purpose of problem solving in medical surgical nursing

شروط القبول فى القسم لبرنامج الدكتوراه

يتطلب الالتحاق بالبرنامج ما يلى :-

1. Master degree with at least C grade (good) from one of the Egyptian universities or one of the accredited universities.

2. Should pass TOEFL examination with the grade approved by faculty council.
3. Student registration for doctoral degree in nursing is allowed during January and June of each year.

نظام الدراسة في القسم لبرنامج الدكتوراه

Obtaining Doctoral Degree in Nursing requires:

- ✚ The student should pass all courses suggested by department council and approved by faculty council for (48-50) credit hour.
- ✚ The student is to make creative research (Dissertation) focused on the topics approved by faculty council after the agreement of department council for at least 2 years from the date of the agreement of the faculty committee on registration of the proposal.
- ✚ The student should submit a protocol about the selected research topic that shows the name of supervisors approved by department and faculty councils.
- ✚ Supervisory staff member should give an annual report to the department council about the progress of the student in her/ his research work.

- ✚ The student should present her completed dissertation to be accepted by defense committee after discussing it 6 months at least before attending the comprehensive exam.
- ✚ The student should pass a written and oral comprehensive exam.
- ✚ If the student wants to change the dissertation, the supervisors should agree and this is considered a new registration from the date of agreement of the Faculty council after the approval of department council.
- ✚ Success in comprehensive exam require the following:-
 - a- The student should pass successfully all course examinations test as well as each part separately and medium should be decided according to the member of exam committee.
 - b- If the student fails in any part of the comprehensive examination, she must attend the exam in all tests again.
 - c- Comprehensive examination for doctoral degree in Nursing is held twice yearly (in April and November).
- ✚ 9- Tests in comprehensive for doctoral degree in adult nursing are :
 - a- Written Exam should be for 3 hours in general adult health nursing.

b- Written Exam should be for 3 hours in Nursing, Surgery and Medicine specialties.

C- General oral examination.

- ✚ 10- The student succeeds when she get 60% in comprehensive exam in every test.
- ✚ 100 degree is the maximum for every exam.
- ✚ If the student can't get the doctoral degree within 4 years from the date of registration, she should abide with the recommendation suggested by the department and faculty council following rules and regulation of university polices.
- ✚ The university committee has the right to refer the matter to special authorities and shown in term (197), after the approval of the faculty council, according to university rules.
- ✚ The mentioned rules in the universities by laws should be applied.
- ✚ The student should get two published paper in scientific journal before the discussion.

الخطة الدراسية لبرنامج الدكتوراه

أ. المقررات الإلزامية

الكود	المقرر	الساعات الأسبوعية	ساعات معتمدة
NUR ٨٠٠	التحليل النقدي للبحوث	٢	٢
NUR ٨٠١	تطبيق النظريات في التمريض	٣	٣
NUR ٨٠٢	تطوير مناهج التمريض	٣	٣
NUR ٨٠٣	طرق البحث العلمي المتقدم في التمريض	٢	٢
NUR ٨٠٤	الاتجاهات الحديثة في مجال التمريض	٢	٢
	المجموع	١٢	١٢

ب. المقررات اختيارية:

الكود	المقرر	الساعات الأسبوعية	ساعات معتمدة
ELECT ٨٠٥	تكنولوجيا التعليم	٢	٢
ELECT ٨٠٦	معايير الجودة في الرعاية الصحية	٢	٢
ELECT ٨٠٧	التعامل مع الأزمات في مجال التمريض	٢	٢

- على الطالب اختيار مقررات اختيارية بعدد ٢ ساعة معتمدة بالتنسيق مع المرشد الأكاديمي
- إجمالي عدد الساعات المعتمدة للمقررات العامة ١٤ ساعة في الفصل الدراسي الأول
- يجب على الطالب أن يجتاز المتطلب المسبق (جزء أول) للمقرر بنجاح قبل تسجيله لنفس المقرر في الجزء الثاني.

ثانياً: المقررات التخصصية:

Doctorate Courses Description

Medical Surgical Nursing (level 1) Course description

This course focuses on the integration of knowledge and skills to provide nursing care and prevent complications of patients undergoing medical and surgical problems and emphasis the of application of evidence based practice, recent research findings and critical thinking abilities to assist adult individual with actual and potential medical and surgical problems such as genetic and genomics, cancer, immunodeficiency, urinary disorders, hepatic disorders, inflammatory bowel diseases ,terminal ill patient and transcultural nursing

Application of nursing research course description

This course introduces postgraduates nursing students to the principles of the research process and their application in nursing. The importance of searching relevant literature, understanding research methods, reviewing research, understanding and evaluating research findings related to the practice of nursing is emphasized.

Medical Surgical Nursing (part 2) Course description

This course will provide doctoral students with knowledge and skills to give nursing care and prevent complications of patients undergoing medical and surgical problems. It emphasizes on the promotion of application of evidence based, recent research finding and critical thinking abilities to assist adult individual with actual and potential problems such as such as neurological disorders, respiratory disorders, cardiac disorders, homeostasis, stress and renal replacement therapy

New Technology in Medical Surgical Nursing (level II)

Course description

This course is designed to provide the doctorate students with opportunities to integrate advancement in medical surgical nursing practice with knowledge and skills of critical thinking abilities, evidence based practice in providing safe nursing care and the application of this modern technologies.

Pathophysiology course description

This course is intended to introduce the advanced knowledge about disease entities, regarding etiology, pathogenic mechanisms, impairment and adaptation of metabolism and organ's function. It emphasizes on pathogenesis of different diseases.

Communicable disease

This course focuses on the study of the communicable disease within community to undertake their role in health promotion of the communities in which they serve.

Applied Pharmacology course description

This course focuses on concepts of safe administration and monitoring the effects of pharmacy therapeutic agents. At the completion of this course the student will be able to understand the major drug classifications and describe principles of safe administration of medication.

Analytic statistics course description

The course intended to provide the doctorate candidates with knowledge, principles, concepts and process that help them to employ statistical methods of analysis to make inferences in application of statistical works in their study.

Medical Diseases course description

This course is aimed at providing the doctoral degree students with basic knowledge and clinical skills essential for dealing with common diseases related to internal medicine and their prevention and management.

Surgery and its specialty course description

This course is designed to provide the doctoral student with knowledge, skills and attitude to identify, analyze, manage and refer surgical problems in providing efficient and

safe patient's care. Emphasis is on common surgical emergencies and specialty.

Course description of research critique

This course provides a comprehensive overview of the essentials of research in nursing. The course describes and explains the steps of the research process particularly the critique and evaluation of research studies for appropriate utilization of research findings in practice. Emphasis is given to quantitative approaches to conduct research and qualitative research methods. The overall purpose of the course is to provide the student with the necessary skills to identify health-related problems, to be knowledgeable, informed and critical readers of the research literature, and to appropriately utilize research-generated knowledge in the practice.

Advanced therapeutic nutrition course description

This course is designed to promote the application of therapeutic nutrition in care of adult patients that help in promoting health and preventing complications of the patients by taking well balanced and therapeutic diet.

Ophthalmology course description

The Course offers intensive instruction in the fundamental sciences underlying ophthalmic practice,

research, including ophthalmic pathology, optics, epidemiology, genetics, immunology, pharmacology, orbit, oculoplastics, neuro-ophthalmology, corneal, refractive surgery, cataract surgery, glaucoma, pediatric ophthalmology and strabismus, and retinal surgery.

Course description of Ear, Nose and Throat

This course will provide the postgraduate students with knowledge and intellectual skills needed to help them to provide care for adult patient with ENT health problems.
