Courses Description

Title

Critical Care Nursing
(first level)

This course continues to integrate knowledge and skills to provide safe and effective nursing care to critically ill adults and Utilize nursing strategies directed towards the care of critically ill patient.

Title

Critical Care Nursing
(second level)

This course is designed to develop a comprehensive theoretical & practical foundation for advanced nursing care in managing adult critically ill patient.

Title

Emergency Nursing

This course is designed to integrate emergency nursing principles and practice in initial patient care and develop proficiency in the emergency management of patients

Title

Research critique in Nursing

This course provide a master degree student with the necessary skills to be knowledgeable, critical reader of the research literature and to appropriately utilize research to generate knowledge in clinical practice.

Title

Research Design

This course provides comprehensive overview of the essentials of research in nursing

Title

Emergency Medicine

This course is designed to provide a comprehensive knowledge related to pathophysiology of disease, advanced investigation & initial management of system disorders.

Title

Specialized Surgeries (Neurosurgery)

The course designed to present advanced Knowledge and skills that help them to make sound decision in giving nursing care, utilize nursing process and apply comprehensive nursing management of adult patients with special surgical health problems.

Title

Pathophysiology

The course designed to provide students with a basic understanding of factors that contribute to the occurrence of various diseases and how those diseases may be treated.

Title

*Critical Care
Medicine*

The course designed to Provide master students with the fundamental knowledge in critical care unit as regards dealing with critically ill patients, and training skills of different critical care techniques

Title

Forensic Medicine

The course designed to discover the cause of a person's death, injury, or disease and to investigate criminal cases.

Title

Geriatric Critical
Care Nursing

The course designed to enable the master nursing student to study the special needs of the geriatric patient within the critical care setting
